Soft Shades

Shade Styles

CLASSIC ROMAN
This version of a traditional flat roman shade has concealed support rods at every pleat to fold neater and lie flatter than other flat shades. Classic Roman shades work well with most fabrics. This shade style is highly recommended for fabrics with a pattern.

HOBLED SHADE
Fuller in body, this style keeps its soft folds even when lowered. Support rods are concealed in the pockets at the back of each fold. Hobbled Roman shades work best with solid or textured fabrics. Not recommended for fabrics with a pattern that will be interrupted by the folds.

KNIFE PLEAT SHADE
Doweled pockets on the back of the shade hold support rods and form decorative seams on the front of the shade. Knife Pleat shades work best with solid or textured fabrics. Not recommended for fabrics with a pattern that will be interrupted by the pleats.

RELAXED SHADE
This soft flowing shade lies flat when lowered but always has a gentle decorative “smile” at the bottom. Relaxed Roman shades work well with most fabrics.

RIBBED PLEAT SHADE
The Ribbed Pleat shade is a reversed Knife Pleat with the pockets to the front of the shade to further accent each pleat. Ribbed Pleat shades work best with solid or textured fabrics. Not recommended for fabrics with a pattern that will be interrupted by the pleats.

PLEATED LONDON SHADE
The Pleated London Shade has decorative inverted pleats approximately 6-8” in from each side. Pleated London shades work best with solid or textured fabrics. Not recommended for fabrics with a pattern that will be interrupted by the pleats.
Standard Specifications

• The shade waterfalls off the front of the headrail. The controls are hidden behind the shade.
• Back Valance made from Premium Rain Repellent Lining
• Premium Wood Headrail wrapped in matching fabric (1-1/2" depth x 3/4" height)
• Ivory or White Premium Rain Repellent Lining (workroom matches)
• Sheer shades are not lined
• Color Coordinating Cords & Tassels
• Cord Lock & Pulley Controls
• Pleat & Pattern matching starting at the bottom of the shade

Size Limitations

Standard (non-sheer) Fabrics

Stacking heights are approximate.

Cordless One Controls® add approximately 2-1/2" to stacking heights.

Cordless ONE Controls®

Horizons Cordless ONE Controls® are a patented (U.S. Patent #8,505,607 B2) lift system which completely eliminates pull cords.

Cordless ONE Controls® are a no charge option on all Soft Shades.

HEADRAIL SIZE:
Cordless ONE Controls® shades up to 60" x 60" are made standard with a 1-1/2" headrail; over 60" x 60" will have a 2-1/2" headrail.

Orders that require shades with both Large and Small headrails will be made with both sizes, but you may specify all Large headrails.

• New York brackets are standard with OM Cordless ONE Controls® shades on 1-1/2" headrails, Specialty New York Brackets are standard with shades on 2-1/2" headrails and Footless NY brackets are standard for IM.

• Cordless ONE Controls® add approximately 2-1/2" to the stacking dimension.

Minimum Width: 18"
Flush IM depth with 1-1/2" headrail: 2"
Flush IM depth with 2-1/2" headrail: 3"
Minimum IM depth: 3/4"
Maximum Size: 96" x 108"

See them in action at www.horizonshades.com/cordless

Installation Methods

2" SCREWS are standard for all IM shades except Cordless Shades. They are simply screwed straight up through the headrail. 3" screws are available with IM turned headrail.

FABRIC WRAPPED NEW YORK BRACKETS (“NY”) are standard for all OM shades with Cord Lock controls, Cordless and Upright Clutch shades on 1-1/2" headrails. The bracket is wrapped in the same material as the shade.

FABRIC WRAPPED EXTENDED NEW YORK BRACKETS (“XNY”) are an alternative OM installation bracket. They extend the shade 2" out from the wall. The bracket is wrapped in the same material as the shade.

FOOTLESS BRACKETS (“FB”) are an alternative IM bracket and standard for IM Cordless Shades.
Fabric Roman Shade Specifications and Options

Measuring Notes
• The workroom will deduct 1/2" from the width for an inside mount (IM).
• See page B76 for measuring instructions.

6" Classic Valance
All six styles of fabric Roman shades may be ordered with a 6" Classic Valance for an additional surcharge.
• Valance length is 6". Custom valance lengths up to 10" are available.
• The valance will hang off the front of the headrail.
• The cord lock and clutch controls are easier to access on the front of the shade.
• Contrasting color valances may be ordered.
• Classic Valances on Sheer Shades are double layered to conceal the hardware.
• Available with Contempo ScallopS. Classic valances with scallops will be 8" at the long point.

VALANCE RETURNS
Valance returns are an option on all shades at no extra charge. Valance returns wrap around the headrail. They are also available on shades ordered without a valance.

BACK VALANCE
A 4" valance comes standard on the back (exterior) side of waterfall and Duo-Fold Roman Shades to hide the hardware. The valance is made from Premium rain repellent lining and gives a beautiful and uniform street side appearance at no additional charge.

Contempo ScallopS
Contempo ScallopS are available on the bottom of Soft Roman Shades (except for Pleated London and Relaxed styles), or on a Classic Valance.

They are offered in five standard styles shown here.

The long point when on a valance is 8".

Standard gimp is included with all Contempo ScallopS. Please choose a color from page B23.

Contempo ScallopS are scaled to the width of the valance or shade.

UpRight Clutch Controls
UpRight is Horizons’ convenient continuous clutch control and is available as a no charge option.

Minimum Width: 12"
Flush IM depth with 1-1/2" headrail: 2"
Flush IM depth with 2-1/2" headrail: 3"
Minimum IM depth: 3/4"

• UpRight Clutch Shades up to 60" x 60" are made standard with a low profile 1-1/2" headrail. Shades over 60" x 60" will have a 2-1/2" headrail.

Orders that require both 1-1/2" and 2-1/2" headrails will be made with both sizes, however all 2-1/2" headrails may be requested.

• For OM shades, the ordered width is the shade width. The valance will be up to 1" wider.

• For IM, the valance will be 1/2" narrower than the ordered width and the shade will be a total of 7/8" narrower (5/8" on the control side and 1/4" on the non-control side).

• The Old UpRight controls are still available upon request; specify “Old UpRight” when ordering.

• Valance returns are not recommended for IM shades with UpRight as they can further increase the gap on the control side up to 1-1/2".

Duo-Fold Controls
Duo-Fold is Horizon’s unique top-down/bottom-up control and is available as a no charge option.

The shade may be raised from the bottom or lowered from the top with cord lock controls on each side.

• Maximum Duo-Fold width is 84".

• Valances are recommended on Duo-fold to cover the controls.

• OM headrails will be 1/2" wider than the ordered size, so the shade will fold up under the valance.

• Back Valances are a standard, no-charge feature on Duo-Fold shades.

• Available with Cord lock operation only.

• Not available with multiple shades on one headrail.
Fabric Roman Shade Specifications and Options

Shade Lining

PREMIUM RAIN REPELLENT LINING is standard at no additional charge on all Roman Shades. The workroom will determine the best color coordination or you may specify White, Ivory, Natural or Khaki.

PREMIUM LINING COLORS

BLACKOUT LINING is an optional upgrade. When you order a fabric roman shade with blackout lining from Horizons, you will receive a truly blackout shade – no pinholes! Our exclusive production method means every stitch is completely sealed for a true blackout shade. This is an exclusive feature of Horizons. The workroom will determine the best color coordination or you may specify White or Ivory.

SELF LINING and CONTRASTING LINING are available for a surcharge.

INTERLINING is an optional third layer between the face fabric and the back lining.

DUAL LINING is an optional dual-layered lining that is a combination of interlining and the standard lining. The workroom will determine the best color coordination or you may specify White or Ivory.

SHEER SHADES are unlined.

Edge Accents Banding

Fabric Roman Shades can be accented with a 2-1/2” wide fabric strip sewn to the edges and bottoms of the shade and valance.

Additional Configurations

---

Sides & Bottom Sides Only Bottoms Only

EDGE ACCENTS BANDING FABRIC CHOICES

Horizons Soft Treatments:
Any of the non-sheer fabrics in the Horizons Soft Treatments sample collection are available as Edge Accents Banding.

---

EDGE ACCENTS BANDING CONTINUED

Decorative Tapes:
Edge Accents Banding is also available in new Decorative Tape Styles. See the Decorative Trimmings pages B24 - B25.

C.O.M.:
Horizons can also apply your own material as Edge Accents Banding. Please refer to the following guidelines:

• **Quantity**: Use the following formula to calculate how many yards of C.O.M. to send for a Classic, London or Relaxed Roman shade:

\[
\text{Yards of C.O.M.} = \frac{(\text{Shade Height} + \text{Shade Width} + 30\text{”})}{36}
\]

This formula is for a standard 54” wide fabric and yields enough material for up to 4 shades. Hobbled shades require adding 50% more material for the folds. For Edge Accents yardage using decorative tapes, please call customer service.

• Please send full widths of fabric that the workroom can cut into strips. See page B65 for “Procedures for sending C.O.M. to Horizons”.

• Edge Accents are not available on sheer shades.

• Knife Pleat and Ribbed Pleat Shades may have edge accents on the bottom only, not on the sides

INSET EDGE ACCENTS

In addition to being placed on the edge of the shade, Edge Accents may also be inset from the edge 2-1/2”. The inset bottom accent is not visible when the shade is raised.

Support Rods

All Horizons Classic, Hobbled, Knife Pleat and Ribbed Pleat Roman Shades are constructed with support rods that are hidden between the face fabric and the lining at no additional charge. Support rods provide stability and crisp, neat folds.

Fabric By The Yard

Cut fabric may be ordered in any pattern. See the Fabric index on pages B68-B69 for the retail cost per yard.

• Fabrics are available in full yards only.

• The minimum order is 1 yard.

Decorative Trimmings

Decorative Trimmings (fringe, gimp, beads and tassels) are available as a beautiful accent across the bottom of the shade and/or valance.

• Horizons complete Decorative Trimmings collection is pictured on pages B20-B25.
Oversized Headrails

The standard headrail size is 3/4” tall by 1-1/2” deep or 3/4” tall by 2-1/2” deep with UpRight and some Cordless ONE Controls® shades. Larger depths of 3-1/2”, 5-1/2” and 7-1/2” are available for a surcharge.

Multiple Shades on One Headrail

Two or three shades mounted on a single headrail, usually with a common valance, is an available option.

- Provide the sizes of each individual shade AND the total width of the unit.
- The sizes of the individual shades must add up to the total width.
- The maximum total width is 144”.
- The workroom will take a 1/2” deduction for inside mount shades and a 3/8” deduction for each space between shades.
- Price as two or three separate shades then add the surcharge from the price page.
- Two-on-One headrails are available with cord locks only if ordered with opposite end controls.
- Three-on-One headrails are only available with clutch or cordless controls.

Turned Headrail

A Turned Headrail has a depth 3/4” and the height is 1-1/2”. This is most commonly used in cases of limited mounting depth and is a no charge option.

- Turned Headrails are not available on UpRight, Cordless ONE Control® or Duo-Fold shades.
- 3” screws are standard for IM. 2” screws are standard for OM. New York brackets are not available.

Customers Own Material (C.O.M.)

- Horizons will make custom fabric shades, draperies, side panels, top treatments or pillows from your own material. See page B65 for procedures of sending C.O.M. to Horizons.

C.O.M. Calculator

- Visit horizonsshades.com/calculator for the Horizons easy to use fabric yardage calculator. For more information about C.O.M. Guidelines see page B66.

Notes About Sheer Shades

- The Classic, Relaxed and Pleated London Sheer Shades are a single, unlined layer of sheer material and are very transparent.
- The pleats of the Hobbled Sheer Shade result in the shade being triple layered. While still not recommended for privacy, the Hobbled Shade is less transparent than the other styles.
- The Knife and Ribbed Pleat Shades are not available in sheer fabrics.

SHEER “UNDER VALANCE”

Waterfall style Sheer Shades are constructed with a special “Under Valance”. The Under Valance is a 3-1/2” tall double layered strip mounted between the shade and the headrail to mask the hardware.

Special Considerations

- Fabric Roman Shades will be straight cut only without railroading or horizontal seams.
- The Relaxed and Pleated London Roman Shades tend to “toe-in” noticeably at the bottom. Inside mounts and multiple shades on one headrail are not recommended.
- The height of a Relaxed or Pleated London Roman is the short point of the “smile.”

November 2019
Fabric Roman Shade Specifications and Options

Roman Shade Fold Alignment
Classic, Hobbled, Knife Pleat and Ribbed Pleat shades may have noticeably different top or bottom fold sizes when multiple shades with different lengths are in the same room.

Horizons aligns the pattern and folds starting at the BOTTOM of the shade. Matching starting from the TOP is a no charge option but must be requested. Top alignment is recommended for side by side window openings of different heights.

Alignment at the Bottom - Standard

Alignment at the Top - Option
12 Reasons to buy soft shades only from Horizons

1. **Premium Rain-Repellent Lining Standard On All Shades & Draperies**
   Greater denier, beauty & protection at no additional charge!

</tbody>
</table>

*Most fabrics can be seamed and have a maximum width of 94”. Some fabrics cannot be seamed. See the chart on page B107 for the maximum width.

Inside Mount Edge Light Gaps
Due to hardware requirements, there are edge light gaps on all Inside Mount roller shades. To avoid light gaps, Outside Mount is recommended.

Roller Wrap
Extra length is automatically added to allow for the top of the shade to wrap around the roller.

Bottom Hems
All Roller Shades are finished at the bottom with a neatly sealed bottom hem.

Installation Brackets

UNIVERSAL SPRING ROLLER BRACKETS are the standard bracket for Spring Roller Shades. They may be used for wall, ceiling or inside mount. Extended Spring Roller Brackets are also available and add 1/2” of projection for clearance.

UNIVERSAL CLUTCH ROLLER BRACKETS are the standard bracket for Clutch Roller shade. They may be used for wall, ceiling or inside mount. Extended Clutch Roller Brackets are also available and add 1/2” of projection for clearance.

Measuring Notes

Cloth Measurement Size (Cloth)
is the width of the cloth on the shade barrel. Specify “Cloth” for outside mounts when a specified fabric width is required and there is room to move the brackets.

Bracket-to-Bracket Size (BB) is the exact size of the shade including the installation brackets. The fabric width of the shade will be approximately 1-1/4” narrower than the bracket-to-bracket size for a Clutch Roller and 1/2” narrower for a Spring Roller.

Inside Mount Size (IM) is the exact width of the window opening. Specify “IM” when you want the workroom to make a 1/8” deduction from the window opening size so the shade will fit inside. Note, the fabric width will be about 1/2” narrower on a Spring Roller, 1/2” narrower on an Easy Stop and 1-1/4” narrower on a Clutch Roller.

Roller Shade

Clutch Roller

Easy Stop™

Spring Roller

Clutch Roller’s gap is 5/8” on each side.

Easy Stop’s gap is 1/4” on each side.

Spring Roller’s gap is 1/4” on each side.
C.O.M. Notes

Due to fabric content, some fabrics are not suitable for fusing. One yard of fabric is REQUIRED for testing.

For the best results please choose dimensionally stable drapery fabrics. Plaids, Silks, 100% synthetic, tapestry, very heavy fabrics, loose weave linens, sheers and fabrics with raised patterns are not suitable for fusion. Because of the nature of fabric, striped patterns may not be perfectly straight. Rare or irreplaceable fabrics should not be sent in for fusing. All fabrics are subject to approval.

Due to the fusion process and the salvage, the maximum unseamed width of a shade made from C.O.M. is 6" less than the fabric width.

C.O.M YARDAGE

To determine the amount of yardage required for a C.O.M. shade call customer service with your shade style.

Seaming

Some fabrics can be seamed to allow the full 94" maximum width. The workroom will take special care in seaming but please note that SEAMS ARE VISIBLE. Below are the fabrics that can be fused and the maximum widths they can be made with a vertical seam. See the fabric index on pages B68-B69 for all the Horizons Soft Treatments fabrics.

PRICING: pages B74 - B75
Twin Shade

The Twin Shade is a dual shade system with a beautiful roman shade on the front and a roller shade on the back that acts like a movable lining. The front roman shade can be from either the Natural Shade, Soft Treatments or Shades of Elegance collections. Choose the back roller shade from the Shades of Elegance roller shade collection.

Installation Brackets

Extended New York ("XNY") Brackets are used for OM Twin Shades due to the larger headrail size, not to increase the shade’s distance from the wall. 2” Screws are standard for IM Twin Shades.

Headrail Sizes

Twin Shades constructed with a 3-1/2” top headrail:
• All OM Twin Shades
• IM Twin Shades over 72" x 72"
• All Twin Shades with UpRight

Twin Shades constructed with a 2-1/2” top headrail:
• IM Twin Shades under 72" x 72" that do not have an UpRight on the front roman shade.

Measuring Notes

For an OUTSIDE MOUNT:
A. The headrail and valance will be approximately 1" wider than the front shade on each side.
B. The front shade will be the exact width ordered.
C. The back shade will also be the exact width ordered.

For an INSIDE MOUNT:
A. The headrail and valance will only be 1/8" narrower than the exact width ordered. Measure the inside width very precisely at the top of the window where the headrail will be mounted.
B. The front shade will be 3/4" narrower than the headrail on the control side and 1/4" narrower on the opposite side.
C. The back shade will be 3/4" narrower than the front shade on each side.

Options

Available options for the front shade:
• UpRight Controls
• Blackout Lining
• Edge Accents Banding
• Decorative Trimmings
• Duo-Fold

See pages B100-B102 for more details about these options.

Options NOT available on a Twin Shade: Waterfall Style, Hobbled Shades, Sheer Shades, Turned Headrills, Multiple Shades on One Headrail, Contempo Scallops, Spring Roller Controls, Decorative Pulls and Motorization.

Pricing: page B70 (front), Section C (back)
Motorized Soft Shades

Horizons Soft Shades are available with either BATTERY powered motors or A/C (plug-in) powered motors. The remote control is radio frequency.

Standard Specifications
- Reliable Somfy motor system
- Premium wood headrail, wrapped in matching fabric (3-1/2” depth x 3/4” high)
- The shade waterfalls off the front of the headrail.
- Ivory or White Premium Lining (workroom matches)
- Pre-programmed for easy installation

</tbody>
</table>

Note: The maximum total size of a battery operated Classic, Knife or Ribbed Pleat Roman shade is 70 square feet with standard lining and 50 square feet with blackout lining. The Pleated London, Relaxed and Hobbled Roman Shades have a maximum total size of 40 square feet with standard lining and 30 square feet with blackout lining.

Controls
- The remote control for all motorized shades are radio frequency (not infrared) and come pre-programmed for your shades.
- Wall switch controls also available.
- One remote control is able to independently operate multiple shades in a single room.

Stacking Space
Motorization adds approximately 4” to the shade’s stacking dimension shown on page B99.

Valances
The height of the valance on a motorized shade ordered with a valance will be 8”.

Measuring Notes
- Record the measurements of multiple shades in one room in sequence -- left to right -- on the order form. The workroom will pre-program the remote control in that sequence.
- Due to the 3-1/2” headrail, Extended New York Brackets are required for OM installation, but do not increase the shade’s distance from the wall. 2” Screws are standard for IM installation.
- Specify the name of the room each shade will be in. This is required information for programming.

Options
All of the standard shade options on pages B99-B102 are available on motorized shades EXCEPT duo-fold, UpRight, turned headrail, Cordless ONE Controls®, hold downs and miters.

Battery Powered Notes
- Each shade includes a reloadable lithium battery pack with 8 “AA” batteries. The life of the battery pack is approximately 2 years under normal daily use. Replacement batteries may be purchased at any store that sells lithium batteries.

A/C (Plug-In) Notes
- A/C shades come standard with a 6-foot long power cord that plugs into a standard wall outlet. Lengths of 3’, 10’ or 24’ are also available. The shades may optionally be hard-wired to the wall by a professional electrician.
- To avoid possible interference, A/C motors should be at least 19” apart.
- The motor location is on the right side of the shade. Motor location on the left may be specified.

Pricing: Price shade from pages B70-B73 plus motorization on page F1
Draperies & Side Panels

Horizons Custom Draperies & Side Panels are available in fifteen drapery header styles: Pinch Pleat, Crown Pleat, Inverted Pleat, Goblet Pleat, Box Pleat, Two Finger Pinch Pleat, Two Finger Crown Pleat, Rod Pocket, Grommet, Flat, Flowing, Gathered Tab Top, Traditional Tab Top, Back Tab and Ripplefold.

See pages B112-B117 for specific order considerations on each header style.

Standard Specifications

- All draperies & side panels are made at 2-1/2x fullness for standard (non-sheer) fabrics, except Ripplefold, Traditional Tab Tops, Back Tabs and Two Finger Pleats which are 2x fullness. For Sheer fabrics all draperies are 3x fullness, except for Ripplefold which are 2.2x (120%) fullness and Two Finger Pleats which are 2-1/2x fullness.
- The leading edge (or overlap) size is 3-1/2" for Draperies and 4" for Side Panels.
- 1-1/2" double folded side hems and 4" double bottom hems
- Ivory or White Premium Rain Repellent Lining (workroom matches)

Size Limitations

Minimum Width: 20"
Maximum Width (one way): 180"
Maximum Width (split): 290"
Maximum Width Ripplefold: 190"
Minimum Height: 24"
Maximum Height: 240"

Measuring Notes

- The workroom will deduct 3/4" from the total height of the drapery/side panel for an inside mount (IM). No deduction will be taken in width.
- See measuring instructions on page B84.

Stacking Dimensions

Stacking dimensions are approximate.
See page B113 for Ripplefold Stack Chart.

What is the difference between a Drapery and a Side Panel

A Drapery is a fully custom panel or pair of panels, made to your exact size in both width and height. They may be traversing or stationary.

A Side Panel is intended to be a stationary treatment at the side(s) of the window. They are made to your custom height and available either 20" or 40" wide (hung on the rod with fullness). A 20" panel contains a full 50" width of material and a 40" panel contains two 50" widths of material. Half width sizes are available.

Rod & Pole Options

PREMIUM TRAVERSE ROD
An architectural-style traverse rod custom assembled to your exact size. It may be used for any traversing drapery style including Ripplefold.
- One-way or split draw rods are available.
- Cord operated are standard, wands are available as a no charge option.

ECONOMY TRAVERSE ROD
A stock, telescoping traverse rod applicable for smaller sizes and lighter draperies like sheers. It is not compatible with Ripplefold draperies.
- One-way or split draw rods are available.
- Cord operated are standard, wands are available as a no charge option.

See Pages B79 for available sizes.

DECORATIVE TRAVERSE RODS
Horizons Decorative Traverse Rods are Premium Traverse Rods with a decorative 2" wood fascia attached (patent pending).
- Cord operated are standard, wands are available as a no charge option.

See Section E for all the Decorative Traverse Rod specifications.

HORIZONS DECORATIVE HARDWARE RODS AND POLES
Any of the Horizons Decorative Hardware styles (see section E of this Product Guide) may be used with non-traversing Draperies or Side Panels. They are available with or without rings.

November 2019
Drapery & Side Panel Specifications and Options

Linings

**PREMIUM RAIN REPELLENT LINING** is standard on all non-sheer draperies and side panels. The workroom will determine the best color coordination or you may specify White, Ivory, Natural or Khaki.

**BLACKOUT LINING** is an optional upgrade. The workroom will determine the best color coordination or you may specify White or Ivory.

**INTERLINING** is an optional third layer between the face fabric and the back lining to provide greater opacity, better energy efficiency and extra fullness. **Note:** Interlining adds weight to a drapery. For draperies over 49 square feet order the Premium Traverse Rod.

**DUAL LINING** is an optional dual-layered lining that is a combination of interlining and the standard lining. The workroom will determine the best color coordination or you may specify White or Ivory.

**CONTRASTING** and **SELF LINING** are also available as extra charge options.

**SHEER DRAPERIES** are unlined.

Returns

- The standard return size for pleated style draperies is 3-1/2" and 4" for Side Panels.
- Return sizes are available from 0" - 7-1/2". The minimum return on a Box Pleat is 3-1/2".
- Rod Pocket, Tab Tops, Grommet, Flat and Flowing Styles are made with no returns.
- When ordering, reference bracket projection of the hardware for the appropriate return.

**Duo-Drapes**

A Duo-Drape is a two-tone drapery made from two complementary fabrics joined at a horizontal seam.
- Please specify the location of the horizontal seam when ordering.
- Similar weight fabrics are recommended for this application.

**Decorative Trimmings**

Decorative Trimmings (Bead Fringes, Tassels, Tassel Fringes and Brush Fringes) may be placed along the leading edge and the stationary edge of the drapery or side panel. Decorative Trimmings are also available on the top and/or bottom of tie-backs.

- Horizons complete Decorative Trimmings collection is pictured on pages B20 - B25.

**Edge Accents Banding**

2-1/2" Edge Accents Banding and Inset Edge Accents are available options on Draperies and Side Panels. All standard (non-sheer) fabrics may be banded or used as banding. Banding may be placed on the leading edge and/or the stationary edge of the drapery.

**Special Considerations**

**Operating Draperies mounted with rings and Operating Grommet Draperies**

Most decorative rods and poles require a center support bracket when ordered over certain widths. Center support brackets will interfere with drapery styles that are intended to be drawn.

The following are the maximum sizes that rods should be installed without a center support.

<table>
<thead>
<tr>
<th>Rod Style</th>
<th>Maximum Width</th>
</tr>
</thead>
<tbody>
<tr>
<td>3/4&quot; Metal Rod</td>
<td>48&quot;</td>

<td>72&quot;</td>
</tr>
<tr>
<td>2&quot; Wood Pole</td>
<td>96&quot;</td>
</tr>
</tbody>
</table>

**Concealed Tie-Back Holders**

Concealed tie-back holders, adjustable from 5" - 8", are available for all draperies.

**Bead Weighted Bottom Hem**

A bead weight can be sewn into the bottom hem of a side panel or drapery to reduce flaring and help thicker fabrics lie straighter for a surcharge.
Pleated draperies are attached to a rod using pin hooks. They can be used as stationary panels or as movable draperies on a traversing rod. There are seven styles of pleated draperies: Pinch, Crown, Inverted, Goblet, Box Pleat, Two Finger Pinch and Two Finger Crown.

About Pleated Draperies

PIN SETTINGS
The standard pin setting is 1-3/4" down from the top of the drapery. Other pin settings are available upon request at no charge. The pin setting for an under treatment is 1-1/2". When ordering a drapery with a Decorative Traverse Rod the pin setting is 1/2".

UNDER TREATMENTS
The workroom will take a 1/2" deduction from the height of draperies used as an under treatments.

SPRING BACK
Pleated Draperies mounted on decorative poles with loose rings may “spring back” slightly from the closed position. To prevent this from occurring order the drapery 10% wider than the pole width.

Example: Using a 90" width, 10% is 9". Add this 9" to the drapery width. 90" + 9" = 99". The rod will remain at 90" wide on the order while the drapery should be ordered at 99" wide to avoid spring back.

PLEAT COUNTS

<table>

<td>180&quot;</td>
<td>54</td>
</tr>
</tbody>
</table>

Note: When ordering loose rings for pleated draperies, add one extra ring to the above chart to account for the lead pleat.
Board Mounted Side Panels

Board mounted side panels are an easy and modern alternative to traditional side panels, eliminating the need for decorative hardware. They are stationary and attach to a board wrapped in the same fabric as the panel.

INTERLINING is an optional third layer between the face fabric and the back lining to provide greater opacity, better energy efficiency and extra fullness.

DUAL LINING is an optional dual-layered lining that is a combination of interlining and the standard lining. The workroom will determine the best color coordination or you may specify White or Ivory.

CONTRASTING and SELF LINING are also available as extra charge options.

SHEER DRAPERIES are unlined.

Returns

• The standard return size for board mounted side panels is 3-1/2". The board depth will match the return size ordered. Return sizes up to 5-1/2" may be requested for Left and Right Return Panels.
• Panels may be ordered as Left Return, Right Return, Both Returns or Both Mitered. Panels will wrap to the wall on the return side only. The board will be mitered on the non-return side to make the board less visible.

Standard Specifications

• All side panels are made at 2-1/2x fullness for standard (non-sheer) fabrics except Two Finger Pleats which are 2x fullness. For Sheer fabrics all panels are 3x fullness except Two Finger Pleats which are 2-1/2x fullness.
• The leading edge size is 3-1/2"
• 1-1/2" double folded side hems and 4" double bottom hems
• Ivory or White Premium Rain Repellent Lining (workroom matches)

Size Limitations

Available Widths: 1 Width, 1-1/2 Widths or 2 Widths
Minimum Height: 24"
Maximum Height: 240"

Installation Brackets

• 2" Screws are standard for Ceiling Mount Panels
• "L" Brackets are standard for Wall Mount Panels

Measuring Notes

Measure from the top of the panel to the floor and deduct 1/2".

Linings

PREMIUM RAIN REPELLENT LINING is standard on all non-sheer draperies and side panels. The workroom will determine the best color coordination or you may specify White, Ivory, Natural or Khaki.

BLACKOUT LINING is an optional upgrade. The workroom will determine the best color coordination or you may specify White or Ivory.
Rod Pocket Draperies are clean, simple panels shirred onto any rod. Because they fit tightly onto the rod, the Rod Pocket style is recommended as stationary only. They may be ordered with or without a header.

**WHAT POCKET SIZE TO ORDER**

<table>
<thead>
<tr>
<th>Rod Type</th>
<th>Pocket Size</th>
<th>Rod Take Up*</th>
</tr>
</thead>
<tbody>
<tr>
<td>1” oval rod</td>
<td>1-1/2”</td>
<td>1/2”</td>
</tr>
<tr>
<td>3/4” pole</td>
<td>1-1/2”</td>
<td>1/2”</td>
</tr>
<tr>
<td>1” pole</td>
<td>2”</td>
<td>3/4”</td>
</tr>
<tr>
<td>1-3/8” pole</td>
<td>3”</td>
<td>1”</td>
</tr>
<tr>
<td>2-1/2” flat</td>
<td>3-1/2”</td>
<td>1/2”</td>
</tr>
<tr>
<td>2” pole</td>
<td>4”</td>
<td>1-1/2”</td>
</tr>
<tr>
<td>2-1/4” pole</td>
<td>5”</td>
<td>1-3/4”</td>
</tr>
<tr>
<td>3” pole</td>
<td>6-1/2”</td>
<td>2”</td>
</tr>
<tr>
<td>4-1/2” flat</td>
<td>5-1/2”</td>
<td>1/2”</td>
</tr>
</tbody>
</table>

*Note: Shirring draperies & side panels onto a rod or pole shortens the height. The workroom will add these allowances for take up.

**HEADERS**

Headers may be any size from 0” (i.e., no header) to 6”. Rod Pocket panels are sewn with standard 2” headers unless otherwise specified. Finished height includes the header.

Ripplefold Draperies are a contemporary drapery named for the soft ripples. Ripplefold Draperies operate on a special premium ripplefold traversing track, available from Horizons and priced on page B79.

**BUTTING VS. OVERLAP**

The center pleats of a split-draw Ripplefold may be made to overlap or butt together when closed. Please specify when ordering.

**STACKING DIMENSIONS**

<table>
<thead>
<tr>
<th>Width</th>
<th>1-Way</th>
<th>Split</th>
</tr>
</thead>
<tbody>
<tr>
<td>24”</td>
<td>11”</td>
<td>8”</td>

</tr>
<tr>
<td>180”</td>
<td>53”</td>
<td>29”</td>
</tr>
<tr>
<td>190”</td>
<td>55”</td>
<td>30”</td>
</tr>
</tbody>
</table>

**RIPPLEFOLD TRACK**

Ripplefold Draperies operate on a special premium ripplefold traverse track, available from Horizons and priced on page B79.

**MEASURING NOTE**

The ordered height is the size of the fabric panel, not including hardware. The Horizons Ripplefold track adds 1 5/8” to the ordered height. For a floor to ceiling application using our track, please deduct 1 5/8” from height and order as an inside mount.

**SEAM EXPOSURE**

Ripplefold Draperies made in multiple widths may have visible seams.
Flat draperies are a simple yet elegant style that are stiffened with buckram and attached to decorative rods with ring clips. Using an even number of rings will ensure that the first and last pleat both face correctly.

**NUMBER OF RINGS**

<table>
<thead>
<tr>
<th>Width</th>
<th>Rings</th>
</tr>
</thead>
<tbody>
<tr>
<td>20&quot;</td>
<td>8</td>
</tr>
<tr>
<td>40&quot;</td>
<td>16</td>
</tr>
<tr>
<td>60&quot;</td>
<td>24</td>
</tr>
<tr>
<td>80&quot;</td>
<td>32</td>
</tr>
<tr>
<td>100&quot;</td>
<td>40</td>
</tr>
<tr>
<td>120&quot;</td>
<td>48</td>
</tr>
<tr>
<td>140&quot;</td>
<td>56</td>
</tr>
<tr>
<td>160&quot;</td>
<td>64</td>
</tr>
<tr>
<td>180&quot;</td>
<td>72</td>
</tr>
</tbody>
</table>

Flowing Draperies are soft, casual, droopy draperies attached to the rod with ring clips. The amount of natural droop may be changed by adding or subtracting ring clips. Note: More rings will cause smaller droops; fewer rings will result in larger droops.

**SUGGESTED NUMBER OF RINGS**

<table>
<thead>
<tr>
<th>Width</th>
<th>Rings</th>
</tr>

</tr>
</tbody>
</table>

**GROMMET SIZES**

**Small Round Grommet:**
The inside diameter is 1-9/16". The outside dimension is 2-3/8". Small Round Grommets will accommodate poles up to a maximum of 1-3/8" diameter.

**Square Grommet:**
The inside diameter is 1-9/16". The outside dimension is 2-5/8". Square Grommets will accommodate poles up to a maximum of 1-3/8" diameter.

**Large Round Grommet:**
The inside diameter is 2-1/2". The outside dimension is 3-3/4". Large Round Grommets will accommodate poles up to a maximum of 2" diameter.
Drapery & Side Panel Header Styles

Square Drapery Grommets

INSIDE DIAMETER: 1-9/16”
OUTSIDE DIAMETER: 2-5/8”

ROD SIZES: Square Grommets will accommodate poles up to a maximum of 1-3/8” diameter.

Large Round Drapery Grommets

INSIDE DIAMETER: 2-1/2”
OUTSIDE DIAMETER: 3-3/4”

ROD SIZES: Large Round Grommets will accommodate poles up to a maximum of 2” diameter.
Standard Specifications

• 3x fullness for sheer fabrics
• 2-1/2x fullness for standard (non-sheer) fabrics
• No lining on sheers
• Standard lining on standard (non-sheer) fabrics
• 1-1/2" headers
• 1-1/2" rod pockets

Size Limitations

Minimum Width: 8"
Maximum Width: 48"
Minimum Height: 8"
Maximum Height: 192"

Measuring Notes

The height of a standard Rod Pocket Top & Bottom includes the headers. The workroom will make allowances for rod pocket take-up.

Rod Pocket Top & Bottom panels are OM only. No IM deductions will be made.

Contour Cut

The Hourglass and Diamond styles are constructed with a contour-cut at the top and bottom which are physically different than the Straight style. This means that an Hourglass or Diamond cannot be converted into a Straight style and a Straight style cannot be converted into an Hourglass or Diamond.

Headers

The default header size is 1-1/2", but any size from 0" (i.e. no header) to 6" can be specified. Also note that the total height of the unit includes the headers.

Rod Pocket Sizes

The default rod pocket size is 1-1/2", but any size from 1" to 6-1/2" can be specified.

</tbody>
</table>

*Note: Shirring the unit onto the rods or poles shortens the height. We will add these allowances for Rod Take Up.

TIE BACKS

Tie backs are 2" tall and long enough to pull the treatment back to 1/3 of its total width. They are flat, fabric wrapped buckram fastened with velcro. They may be made from contrasting material or C.O.M. Tie backs are required for Hourglass and Diamond styles. Tie backs cannot be used with the Straight style.

FULLNESS

2-1/2x fullness is standard for standard (non-sheer) fabrics. 3x fullness is standard for sheer fabrics. Sheers can be ordered at 4x fullness for an extra charge.

LINING

Sheer Rod Pocket Top & Bottom Panels are fabricated unlined. All standard (non-sheer) fabrics are standard with Premium Rain Repellant Lining, unlined (no extra charge), contrasting (surcharge), blackout (surcharge) or self lining (surcharge).

RODS

Optional Sash Rods for Outside Mount units or Spring Tension Rods for Inside Mount units are available for an additional charge upon request. Our standard rod pocket size of 1-1/2" will accommodate either type of rod.

PRICING: pages B82-B83
Motorized Drapery

Horizons Pleated Drapery styles are available with A/C (plug-in) powered motors. The remote control is infrared.

Standard Specifications

- Heavy-duty Somfy motor system
- Pre-programmed for easy installation
- One-way motors are positioned on the stack side of the drapery. The motor location for a split draw must be specified on the order form as left or right.

Size Limitations

| Minimum Width: | 24” |
| Minimum Height: | 24” |
| Maximum Width:  | 240” |
| Maximum Height: | 240” |

Remote Control

- The remote controls for all motorized draperies are infrared (line of sight) and come pre-programmed.
- A single remote control operates multiple draperies in a single room.

Measuring Notes

- Record the measurements of multiple draperies in one room in sequence – left to right – on the order form. The workroom will pre-program the remote control in that sequence.
- For detailed measuring instructions see page B84.

A/C (Plug In) Notes

A 9’ power cord is standard and plugs into a standard wall outlet. The drapery may be hard-wired to the wall by a professional electrician.

Stacking Space

The motor adds approximately 5” to the drapery’s stacking dimensions shown on page B110.

Options

The standard drapery options of lining, interlining, decorative trimmings and edge accents are all available on a motorized unit. Ripplefold draperies are not available motorized.

**Upholstered Cornices**

Horizons Upholstered Cornices are beautiful padded fabric top treatments available in seven decorative styles.

**Standard Specifications**
- Constructed with 7/16" OSB (Oriented Strand Board).
- 10 oz. per square yard (1-1/4" uncompressed) batting.
- Returns and board are self lined with the face fabric. The back of cornices are lined with ivory or white Blackout Lining. (workroom matches)
- Cornices over 96" wide will be hinged at the center.

**Style: C1**

**WIDTH:**
- Minimum: 24"
- Maximum: 192"

**HEIGHTS:**
- Minimum: 8"
- Maximum: 30"

**MEASURING/MOUNTING NOTES:**
- Outside mount only.
- Cornices are constructed with fabric wrapped wood legs for returns. Add a minimum of 3" to the width to allow for their thickness.
- Cornices are installed with “L” brackets supplied by Horizons.

**RETURN/BOARD SIZES:**
- A 3-1/2" board/return is standard.
- 1-1/2", 2-1/2", 5-1/2", 7-1/4" and 9-1/4" boards/returns are also available.

**Mitered Cornices**

Mitered Cornices are used to butt cornices meeting in a corner or bay.
- Any miter other than a 90° angle requires a template or an exact drawing of the actual angle.
- When ordering, give the measurement from the corner to where the cornice will end.

**AVAILABLE FABRICS:**
The C1 is only available in non-sheer Horizons Soft Treatments fabrics or C.O.M.

**FABRIC ORIENTATION:**
- Most fabrics will be railroaded as standard, except fabrics with distinct vertical orientation, which will be cut and seamed.
- Cut & Seam is also available upon request.

**DECORATIVE TRIMMINGS:**
Decorative Trimmings may be applied on the bottom edge. See pages B20 - B25 to view the entire line of Decorative Trimmings.

**BOTTOM BAND:**
A band of contrasting fabric is an option on the bottom of the C1 cornice style for a surcharge. Specify the height of the band from 2" - 4". The top of the band will have a 1/4" welt.

**WELTING:**
A 1/4" welt at the top and 1/4" welt on the bottom is standard. A contrasting welt is optional at no additional charge. Cornices may also be made without welting on the top and/or bottom at no extra charge, with the exception of hinged cornices over 96", which require welting.

**PRICING:** page B86
Upholstered Cornices Specifications and Options

Styles: C2 - C7

WIDTH:

- 4 pleats up to 45” wide
- 5 pleats up to 50” wide
- 8 pleats up to 60” wide
- 10 pleats up to 75” wide
- 11 pleats up to 90” wide
- 12 pleats up to 105” wide
- 13 pleats up to 120” wide

**MEASURING/MOUNTING NOTES:**
- Outside mount only.
- V22 is mounted with “L” brackets like a traditional cornice.

**RETURN/BOARD/ROD SIZES:**
- A 3-1/2” board/return is standard.
- 1-1/2”, 2-1/2”, 5-1/2”, 7-1/4” and 9-1/4” boards/returns are also available.

**AVAILABLE FABRICS:**
The V22 is only available in non-sheer Horizons Soft Treatments fabrics or C.O.M.

**FABRIC ORIENTATION:**
- Most fabrics will be railroaded as standard, except fabrics with distinct vertical orientation, which will be cut and seamed.
- Cut & Seam is also available upon request.

**LINING:**
This style is blackout lined only.

**EDGE ACCENTS BANDING:**
2” banding is optional at the bottom edge of the valance.

**DECORATIVE TRIMMINGS:**
Decorative Trimmings may be applied on the bottom edge. See pages B20 - B25 to view the entire line of Decorative Trimmings.

**WELTING:**
A 1/4” welt at the top is standard. A larger 1/2” welt is optional. A contrasting welt is optional at no additional charge.

**MITERS:**
Any miter other than a 90° angle requires a template or an exact drawing of the actual angle. When ordering, give the measurement from the corner to where the valance will end.

Accent Pillows

Horizons Accent Pillows are available in all of the non-sheer Horizons Soft Treatments fabrics or C.O.M.

Standard Specifications

Horizons Accent Pillows are constructed with a performance luxury fill (silicone coated hollow fill garnetted fiber) with a premium non-woven cover.

Sizes

11” x 11”
13” x 13”
15” x 15”
16” x 16”
18” x 18”
19” x 19”
21” x 21”

The above sizes are approximate. Due to fabric variations, the actual size may vary by up to 2”.

Options

WELTING
• 1/4” or 1/2” welting is available for a surcharge.
• Unless specified the welting will match the pillow. A contrasting welt color is available at no extra charge.

BUTTONS
• An optional 1-1/2” center button is available for a surcharge.
• Unless otherwise specified the button will match the pillow. A contrasting button color is available at no extra charge.

DECORATIVE TRIMMINGS
• All of the Horizons Decorative Trimmings are available for use on Accent Pillows. See pages B20-B25 for all the available styles and colors.

C.O.M. TRIMS
• Horizons will customize your pillow as long as the edging, carding, or fringe is on a band or strip that is able to be machine sewn and does not require hand stitching. However, the workroom will hand stitch individual corner tassels as shown in the photo above.
• See page B67 on how to send C.O.M. trim to Horizons.
• Use the following formula to calculate how much C.O.M. trim to send: Add 8” to the perimeter (outer edge) of the pillow.

Example for an 18” pillow:
4 sides multiplied by 18” = 72”
72” + 8” = 80” of C.O.M trim.

CONTRASTING FABRIC
Contrasting fabric for the opposite side of the pillow is available. Price from the higher of the two price groups plus the surcharge on page B96.

PRICING: page B96
