

## **C.O.M. LAMINATED SHADE COMPATIBILITY, PROCEDURES & GUIDELINES**

Please see page B13 of the Product Guide for C.O.M. requirements, C.O.M. yardage charts and information about seaming.

### **UNACCEPTABLE FABRICS:**

- PLAID
- 100% SYNTHETIC
- TAPESTRY
- VERY HEAVY FABRICS
- FABRICS WITH RAISED PATTERNS
- RARE OR IRREPLACEABLE FABRICS

### **CAUTION: STRIPED PATTERNS**

Striped patterns will not lie perfectly straight.

### **CAUTION: SEAMING**

When seaming is required, THIN SEAMS WILL BE VISIBLE

### **ALL FABRICS MUST BE TESTED BEFORE AN ORDER IS ACCEPTED FOR LAMINATION**

One yard of COM fabric must be sent in for testing before an order will be accepted. The test fabric will be washed, laminated and seamed to check it's adequacy for lamination. This yard of material will be consumed in the testing process.

### **Sending in the test yard:**

1. Fax, email or call the order into B&W customer service as usual.
2. Customer service will send back the B&W order number to track of the material.
3. Send in one yard of material for testing. Clearly label it as "TEST MATERIAL" and with the B&W order number and your purchase order number and side mark.
4. Testing will take approximately 3 days not including shipping time.
5. Once testing is complete you will be notified of the result.
  - If the material passes the testing procedure, follow the procedures on page C114 of the Product Guide for sending in the C.O.M. Yardage requirements are on page B13.
  - If the material fails the testing process, test yard will have been destroyed in the testing process and not be returned.

### **LIMIT OF LIABILITY**

As noted above rare or irreplaceable fabrics should not be sent in for laminating. B&W's liability for fabrics that fail after being laminated is limited to the cost of the fabric or \$100, whichever is less.

# The Laminates Collection Specifications and Options

## The Laminates Collection

The Laminates Collection is a beautiful selection of drapery fabrics laminated to quality blackout shade cloth, all on a smooth running clutch roller shade. Choose a fabric from the Horizons Soft Treatments collection or C.O.M. 

## Standard Specifications

- Clutch Roller Shade Controls
- Blackout backing only

## Size Limitations

Minimum Width: 8"  
 Maximum Height: 96"  
 Maximum Width: 96"\*  
*\*Most fabrics can be seamed and have a maximum width of 96". Some fabrics cannot be seamed. See the chart below for the maximum width.*

## C.O.M. Requirements

Due to fabric content, some fabrics are not fit for laminating. For the best results please choose dimensionally stable drapery fabrics. Plaid, 100% synthetic, tapestry, very heavy fabrics and fabrics with raised patterns are not suitable for lamination. Because of the nature of fabric, striped patterns will not be perfectly straight. Rare or irreplaceable fabrics should not be sent in for laminating. All fabrics are subject to approval.

If a fabric is questionable, additional yardage may be required for testing.

Due to the lamination process and the salvage, the maximum unseamed width of a shade made from C.O.M. is 6" less than the fabric width.

## C.O.M. Yardage Charts

Use these charts to determine the amount of yardage required for a C.O.M. shade.

Fabrics with no repeats

Height to:	Width to:	
	48"	96"
48"	2 yards	4 yards
96"	4 yards	8 yards

Fabrics with repeats up to 27"

Height to:	Width to:	
	48"	96"
48"	2 yards	5 yards
96"	4 yards	9 yards

Add 2 yards for a valance

## Seaming

Most fabrics can be seamed to allow the full 96" maximum width. The workroom will take special care in seaming but please note that SEAMS ARE VISIBLE. Please see the fabric index below for maximum widths.
